

RUEF MAY GET OUT UNDER A HEAVY BOND

Court Decision Says Freedom May Be Obtained by Giving \$300,000 Bail.

SAN FRANCISCO, Dec. 2.—By order of Judge Frank D. Cabanis, bond for the release of Abraham Ruef was fixed today at \$300,000, with the sureties qualifying for double that amount.

Ruef's attorneys are now preparing the bonds and the sureties will be presented for the approval of the court tomorrow morning, at which time it is expected that the former political leader will be released from the branch county jail, where he has been confined since Francis J. Heney was shot while prosecuting him for bribery more than a year ago.

At that time Ruef was out on bail amounting to \$750,000, but in the excitement which followed the shooting he was removed to custody and remained in the county jail after his conviction, which followed shortly.

The new petition for bail was filed several days ago, at which time twenty physicians signed a statement asserting that the incarceration of Ruef was undermining his health.

Before considering the petition, the court appointed a board of three physicians, who examined the prisoner and reported today that he was suffering from a complication of maladies which would in time endanger his life.

Round trip rates to California \$50, good for six months returning; three daily trains. If interested, write at once to K. C. Kerr, D. P. A., Salt Lake City, for any information about resorts and hotels. Ask for booklet.

IN POLICE COURT

Grace Webster, a rather good-looking negro, was before his honor in the police court Thursday afternoon on a charge of disturbing the peace. Grace pleaded guilty and was fined \$10, which she paid. Grace is much whiter than black, and when she entered a local cafe and ordered a meal it was served to her. Afterward it became known that she was "not what she looked to be," and she was asked to pay for her meal and leave. Thereupon she left with a variety of fireworks which would hardly look good in print. The police were notified and Grace was landed in the cooler, where she has had an opportunity to think matters over.

Grace addressed the court, making what she termed a "plea" in her own behalf, but which sounded strangely like something else. The court stopped her "argument" and imposed the fine. Grace left the courtroom with her nose high in the air.

Jack Sexton, arrested Monday evening by Patrolman McMartin on a charge of petit larceny, asked that his case go over until today, when he will enter his plea. He is accused of breaking into a room at the Elko rooming house, from which he walked away with \$8 in his pocket, not his property. He is said to have confessed to the police.

At the morning session of court J. W. Davis, a negro, charged with robbery, was given his preliminary hearing. Owing to the fact that certain witnesses were not present the case was continued until this morning. Frank Burkhardt claims that Davis stole \$5 from him in a Commercial street resort Sunday, October 21.

Public Parks and Good Roads Pressing Needs of Southern Idaho

BY C. E. ARNEY.

Special to The Tribune.
BOISE, Ida., Dec. 2.—It has been a great pleasure during the past few weeks to visit and comment on the growth of most of the towns of southern Idaho from Weiser to St. Anthony. It has been a great disappointment to observe one omission in most of these towns—that is, the space for town parks.

There is no town in south Idaho that is not in the midst of a beautiful growth, complimentary to its unusual high order of citizenship. None of them appear to have property values beyond the reach of reason to men seeking business or residential locations.

There is a healthful atmosphere of optimism in all these southern Idaho towns indicative of an abiding faith in their steady upbuilding.

In a majority of the towns are observed the construction of many handsome stores, residences, schools, churches, libraries and club buildings, and a goodly number are voting bonds for municipal improvement, such as sewerage, waterworks and pavement.

No one can review these evidences of healthful development without being imbued with a profound degree of enthusiasm for the future of this great arid empire, of which these respective towns are the centers of trade.

With the country surrounding each in its infancy, the future is entirely secure. The permanence of these municipalities is certain as the existing mountains which serve as a repository for the winter's snow, which sustain the sure and steady flow of the mountain streams that wind their way down the fertile valleys and give life to an otherwise desert soil.

Yet the community life of these towns, aside from two or three, is sleeping on its golden opportunity to gain title for the municipality, to grounds for parks for the future health and comfort of its people.

This is a sorry omission. There is not one half of one per cent of the population of these towns who have any lingering suspicion that property taxes will be lower in years to come. There is nothing in any of them to warrant such a conclusion. The past year is replete in proof conclusive that next year will see values increase over this, as this year they have increased over last year.

Faith in the future of a town should be substantially evidenced by the purchase of blocks of ground, and they should be set in grass and ornamental trees, thus making a park, a blessing to the present and the future generations.

Governor James H. Brady has issued a call for the county commissioners to congregate in this city for a conference on December 13.

An effort will be made to have a mutual understanding as to the equalization of the taxes, as there is now existing a great many inequalities in the returns to the state board of equalization, of which the governor is ex-officio chairman.

An additional function to be performed by the county commissioners at this joint session will be the consideration of a plan to better provide for some feeble-minded wards of the state. The governor has information of thirty-

eight of these unfortunates. Most of them are maintained at county expense, and if properly cared for, an attendant is necessary. The plan to be considered is to locate these feeble minded in convenient districts where for attendant many supervise several of these wards at a reduced cost to the counties which must bear the burden, making it better for the charge in lightening the burden of the respective counties.

Another feature of the meeting is to be the consideration of good roads. The commissioners of the various counties of the state have primary appointive power of the highway supervisors of their respective counties. This fixes responsibility on them for the condition of the roads of Idaho. Governor Brady has procured a lecturer for this conference, an assessor in the person of Samuel C. Lancaster of Rochester, Minn., an expert on the subject, who illustrates his observations by stereoscopic views in this and foreign countries, of improved highways.

The meeting promises to be of great interest and benefit to Idaho.

Next Monday Ada county will vote on the acceptance or rejection of a new county road system, provided by the last session of the Idaho legislature. This is a sort of referendum piece of legislation. The only effect of the December 6 vote on the road question in Ada county is to determine whether the voters of the county will instruct their commissioners to act under the new or proceed under the old road district law. Should the new law be accepted the board of commissioners would be privileged then to call for a vote on a bond issue for substantial building of rural highways in Ada county and on this subject the tax payers would again be privileged to voice their sentiments for or against the bond issue.

In the operation of this new legislation the farmers of Ada county fall heir to the greatest degree of the benefits to result, for under the law 60 per cent of the cost of the road is apportioned to the city, to be spent under the direction of the city council, while 40 per cent is apportioned to the county for the exclusive benefit of the highways outside the city limits.

Thus far there is no evidence of opposition to the plan, as the city tax payers appear to appreciate the benefits which would accrue through the betterment of the highways leading to the city.

Through the acceptance of the provisions of this new law, the commissioners will be charged with the responsibility of selecting the whole county to be a complete road supervisor; one specially equipped with knowledge gained through experience, for the establishment of a comprehensive system of construction and of maintenance of good roads and good bridges throughout the county.

The county folks appear to be fully awake to the necessities of this improved, progressive system of good roads legislation.

On the bench below Boise a few miles is a "fruit growers' association," which makes an appeal for the acceptance of this county system in the following resolution:

"The country districts look at this election as a matter of interest to the whole county and urge the people of Boise to cooperate with the rural districts by voting for the county system."

Mr. B. F. Haydel, a United States highway engineer, now engaged in building—as an example—a piece of road in Canyon county, near Caldwell, is an advocate of the acceptance of this county plan by all the counties of Idaho. While visiting the capital city yesterday, he stated that in the event of the acceptance of this advance legislation, a highway engineer would probably be detailed from Washington, D. C., to render such assistance and expert advice as might be necessary, free from cost to the county government.

The county good roads organization is advocating the acceptance of this new law by arranging a series of public meetings to be addressed by believers in the efficacy of the county system.

Perhaps the most interested of all Ada county people in the outcome of this election, are the automobilists of Boise. They have an organization of fifty-three members and there are about 125 machines in the city. The roads outside the city limits are very difficult for them to travel, and on Monday the sixth these conveyances will all be in evidence carrying to the polls those whom they believe to be supporters of this new system for a higher plan of highway improvement.

Boise City and the valley adjacent has been singled out for increased railroad facilities, as evidenced by a corps of Oregon Short Line surveyors, who have, this week, run a preliminary line of survey down the valley and through Boise. The line is presumed to begin at Orchard and end at Payette. This is said to forecast the coming of the main line through the canyon city.

Those who adhere to this belief, argue that the proposed new survey would shorten the distance over the present main line from Orchard to Payette by six miles.

The survey parallels the Boise & Interurban from a point near Pierce Park, five miles below the city, to Middleton, where it is supposed to branch and parallel the "Dewey line," known as the Idaho Northern, to Emmett, where it would connect with the Payette valley branch, which is now preparing to build from New Plymouth to Emmett. The Payette valley road, known locally as the "Pumpkin Vine," is recognized as Short Line property.

COST OF REPAIRS IS ESTIMATED AT \$4000

Following a resolution introduced by Councilman L. E. Hall, the city engineer has prepared an estimate of repairs, so as to permit connection with the intercepting sewer.

The work is from Seventh South, half a block north, and from First South, half a block north. The estimated cost of the work is \$4000.

New Mining Company.
The East Park Mining company filed articles of incorporation with the secretary of state Thursday. The capital stock is \$300,000, with shares of \$1 each. One hundred thousand shares are treasury stock. The officers are: George Ames, president; R. E. Wright, vice-president; O. C. Lockhart, secretary and treasurer; F. J. Hanson, L. B. Wright, additional directors. The company's principal place of business is a Fairview City. It takes over seven Overlook mining claims.

Governor Gets First of Indemnity Lands
Governor Shry Thursday received from the general land office the list of indemnity lands which the state receives for loss of school lands. The total acreage of the approved list is 42,118.24 acres. The state gets this land in lieu of granted lands for the support of the common schools, lost to it by reason of being included in national forests.

Salt Lake Statistics

Births.
John W. Jeffs, 380 West Fourth North, son.
Donald H. Major, 552 East Fifth South, daughter.
Lorenzo Harris, 529 Fifth East, daughter.

Battle With Strikers.
WHEELING, W. Va., Dec. 2.—Shots were exchanged today between strikers and the men who yesterday voluntarily returned to work in the mills of the American Sheet and Tinplate company, a subsidiary of the United States Steel corporation. One man employed in a factory adjoining the mills was slightly wounded. Extra deputies have been summoned.

A Bald-Headed Woman

Shorn of Her Crown of Beauty Loses in Love and Marriage.

Hair is certainly most necessary to woman. Who could love and marry a bald-headed woman? What charms could one array to offset such a disfigurement?

A woman's goal is usually love and marriage. Her crowning glory is her hair. The loss of her hair mars her beauty, happiness and success. Yet right here where we live, are thousands of women neglecting or injuring their hair to such an extent that it is only a matter of time when it will be utterly ruined.

Many women destroy the beauty of their hair through thoughtlessness or ignorance of certain facts. They do not shampoo their hair often enough, or too often. They use soaps or preparations which contain ingredients harmful to the scalp and hair.

As a result of such treatment, dandruff is created, the hair loosens, loses color, falls out, and baldness commences, unless proper and prompt precautions are taken in time. Then again, microbes and certain diseases bring about unhealthy scalp and hair conditions.

Most people can rid themselves of dandruff and correct diseased scalp and hair conditions if they will use the right remedy. We have that remedy, and we will positively guarantee that it will eradicate dandruff and prevent baldness or it will not cost the user anything.

That's a pretty broad statement but we will back it with proof. It is our own money. Revall "93" Hair Tonic is the remedy that will grow hair and overcome scalp and hair troubles. It will grow hair even on bald heads, unless all life in the hair roots has been extinguished, the follicles closed, and the scalp is glazed and shiny. It gets its name from the fact that it grew hair in 93 out of 100 cases, where it received a thoroughly hard, impartial and practical test.

We want you to try Revall "93" Hair Tonic at our risk. You surely cannot lose anything by doing so, while you have everything to gain. You would better think this over, and then come in and see us about this offer. You will be well repaid for your visit to our store. Two sizes, 50 cents and \$1.00. Remember you can obtain Revall Remedies in Salt Lake only at our stores—The Rexall Stores, Smith Drug Co. and Druehl & Frankon.

"Send the same teamster."

Hear it every day. Needless to say it refers to the BLUE WAGON teamsters.

We help to make the coal better.

KORDON'S CATARRH JELLY

Will YOU Accept This Instant Relief FREE?

SEND us your name on a postal. We will mail you a sample of Kordon's Catarrh Jelly FREE. At All Druggists, 25c and 50c. Sanitary Tubes, or Sample FREE.

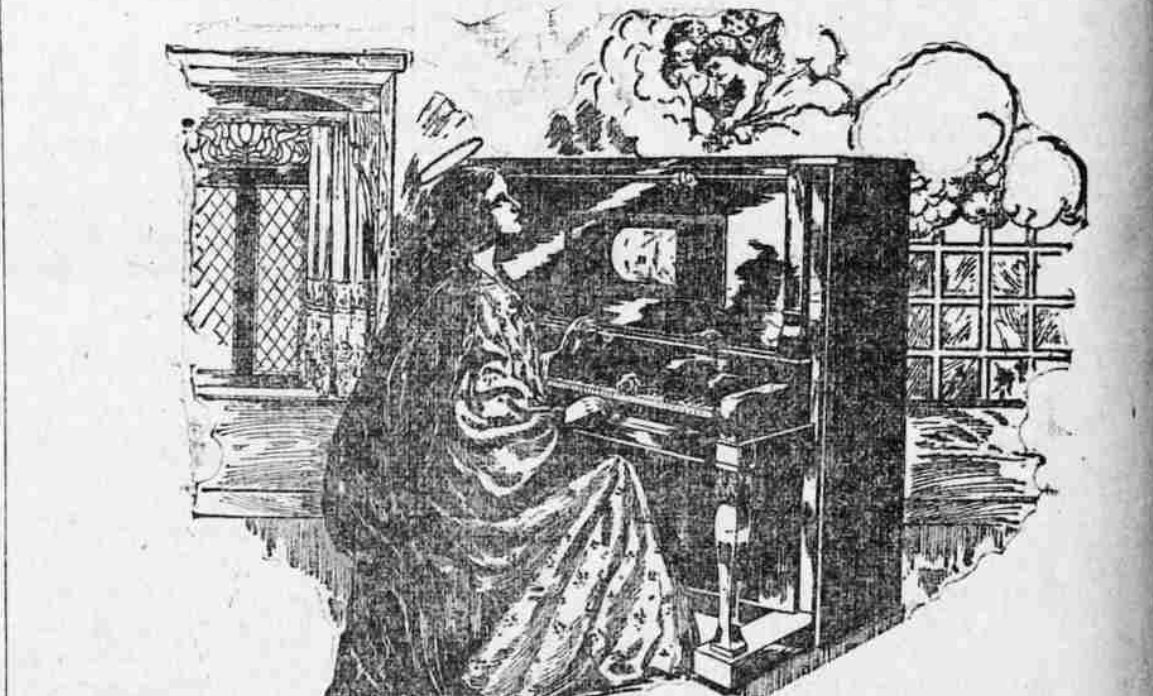

—Enough for several days' treatment. —Enough to prove to you conclusively that it is the most marvelous remedy for catarrh, the pleasantest, safest, most soothing and healing method for the treatment of this foul disease. —Kordon's Catarrh Jelly is applied directly on the raw surfaces. —Reduces the thickened membranes, stops abnormal discharges, clears the nasal passages for easy, natural breathing and permits the air to pass through the lungs over healthy surfaces. —That is the logical way to cure catarrh—Dr. Kordon's way. —You would not apply salt water to a wound—nor spray it with a violent medicine which would burn, itch and irritate the raw places. —For the same reason you should stop the use of sprays, snuffs, douches and atomizers for catarrh. The delicate lining of the nasal passages is raw, inflamed—sore from the action of the catarrh germs. —Kordon's Catarrh Jelly is soothing, healing, pleasant and cooling. Apply it once and you will have instant relief. Continued use, three times a day, will effect a permanent, safe and speedy cure of Catarrh, Catarrhal Deafness, Hay Fever, Asthma, Cold in the Head, Catarrh of the Stomach, or any complication resulting from chronic nasal catarrh.

Remember, that Kordon's Catarrh Jelly is sold by over 35,000 druggists in the United States—but if you do not have it, send us for 25c or 50c (stamps or coin), and we will mail once, postpaid. The 50c size contains three times as much as the 25c size. Every package is sold under our absolute guarantee of satisfaction or money refunded. Send for free sample today.

A Musical Composition is the Expression of a Thought

Just as a certain Painting carries you away from your immediate surroundings and gives you a mental rest, so does a splendidly interpreted Musical Composition. Therein is the value of Music—therein is its Power. But that Power is only effective when the Musical Composition—the Composer's Thought—is Properly Interpreted. If that is changed, debased, cheapened, we do not get what we should from the Music.

There are few Player Pianos that can render a Composition as its Composer Intended, or as the Performer wishes. Most Player Pianos perform on only 65 notes of the keyboard, whereas the Piano keyboard comprises 88 notes and usually the most effective Tonal Nuances are made on notes ordinary Player Pianos can't play.

CECILIAN PLAYER PIANOS

are ideal for the rendition of a Musical Composition as its Creator Intended or as the Performer wishes. The Construction is of metal—non-affectable by heat or cold, dampness or wet—everlastingly durable. Then the Cecilian Player Piano plays the entire keyboard of 88 notes. A composition as performed on the Cecilian is not "butochered." It doesn't sound mechanical—it's a Great Thought, carrying you away from yourself, mentally refreshing and exhilarating.

AN INVITATION TO YOU

Come and examine the Cecilian Player Pianos in our warerooms—you will be our guest and you will not be importuned to buy. We're demonstrating the Cecilian Player Piano and the Victor Victorolas (Talking Machines), at the Pure Food Exposition this week. Hear them.
